

1. Some distinction needs to be made where
~~the~~ reference is made to CIA. - What parts
of CIA? Field elements which become a part
of the theater command - responsive to military
except for requirements of national scope which
military does not have control over.

Relation between CIA war planning in strategic
island areas and military planning in
theaters of operation ~~that~~ may overlap.

The actual organizational makeup of CIA in
the field in wartime with its relations to the
theater commanders ^{needs to be stayed out} seems to be overlooked
in these considerations. Will CIA have
field organizations independent of military
theater organization in time of war?

25X9

Employing nuclear weapons in satellites -
good concept - to rethink & reframe
national policy -

CIA's actual wartime role has been somewhat left to the imagination or perhaps it is so well understood that it need not be reviewed in principal here.
